ENVIRO STAINS are a line of water based, non-acid polymer bonded stains that penetrate into the concrete surface to produce vibrant long lasting UV resistant stains that enhance any concrete surface.

Not having to rely on a chemical reaction with the hydrated lime in the cement, Enviro Stains provide more predictable results than acid stains yet yields the same look.

ENVIRO STAINS contain no arsenic, lead, or mercury and very low organic solvents that conform to all VOC regulations.

Available in 11 translucent colors to bring your concrete surface to life.
