

Reactive Concrete Acid Stain

From Decorative Concrete Solutions

Golden Wheat

Maylay Tan

Vintage Umber

English Red

Cola

Dark Walnut

Black

Aqua Blue

Green Lawn

Fern Green

Our unique vibrant concrete stains are specially formulated to produce brilliant colors that are not available by any other coloring process. The results are striking and dramatic.

Our stains react chemically the minerals that are present within your concrete surface. Penetrating permanently resulting in a concrete coloring process that is as unique as you are yourself.

The color is achieved when the stain solution comes in contact and reacts with the minerals in your cement. This reaction creates a color that is translucent and variegated. A look that is unmatched by any other coloring process.

A rustic charm that invites a warm sense of appeal to any décor. Unique to any other finishing method.
